Dear Sir,

We are engaged in a series of articles about signal modules and would like to add the photo of the "SE74" from your website to our model railway encyclopedia <https://encyclopedie.beneluxspoor.net/index.php/Hoofdpagina>. We would also like to receive permission to use and translate to Dutch the features from the instruction sheet. Would you be so kind as to grant us permission? Of course we will credit you as the source of the photo and we will link to your website.

Best regards,  
Fred Eikelboom  
(editorial staff, model railway encyclopedia) Netherlands.
